

ACT 250 Criterion 9(B) Review Materials Checklist:

- ANR Atlas or Web Soil Survey Map depicting soil types

- Site plan(s) (with a scale) with the following:
 - The entire parcel boundary
 - Soil Types
 - Contours (topo map) - if you want to call steep slopes into question
 - Wetlands and Open Water (indicate Class)
 - Rock Outcroppings
 - Previous impacts (houses, driveways, leach fields, wellheads, junk piles, etc)
 - Proposed development envelope. This includes not just the footprint but also utilities, leach fields, pipelines, wellheads, access roads, parking and indirect impacts (fragmented soils)
 - Proposed On-Site Mitigation Areas and Proposed Access (if you are pursuing on-site mitigation)

- A matrix showing the following:
 - Soil Type
 - Agricultural Value (1 through 7)
 - Acres of Each Soil Type
 - Acres of Each Soil Type Impacted –
 - Column for Existing Impacts
 - Column for Proposed Development Impacts. *Any fragmented Primary Agricultural Soils Would Be Considered Indirectly Impacted.*

- ACT 250 Application Schedule B - Criterion 9(B) section

- Previous permits and supporting information (findings, application, letter from Agency of Agriculture, exhibits, etc.)
