All applicants are hereby notified that proposals must be submitted electronically to AGR.WaterQuality@Vermont.gov by the close of business (**4:30 pm**) on the **proposal due date February 15, 2023**. Applicants are cautioned that it is their responsibility to originate the sending of proposals in sufficient time to ensure receipt by the State by the proposal due date. The amount of State funding available through this funding opportunity is \$500,000. The State intends to award multiple grant agreements for a maximum award timeframe of 2-years.

A. Introduction and Purpose

Local and regional partners play a vital role in the education, outreach, implementation, and verification of conservation practices that will achieve reductions in nutrient runoff from agricultural operations. Additionally, partners provide a critical link between state agency programs, federal agency programs and landowners. The Agency of Agriculture, Food and Markets (the Agency) is pleased to offer the Agricultural Clean Water Initiative Program (Ag-CWIP) grant funding opportunity to businesses, organizations, and individuals who work with farms to support the improvement of water quality across the state of Vermont. This funding opportunity will support discrete organizational capacity development activities that will result in increased and enhanced services to the agricultural community related to improving water quality. Activities supported by this funding will support efforts to reduce agricultural nutrient runoff throughout the State of Vermont. Funding for Ag-CWIP Grants is made possible through the [Clean Water Fund](#), which was developed as part of Act 64, the Clean Water Act.

The Agency expects the Grantee(s) to develop a proposal and drive their own work to develop organizational capacity related to improving water quality in Vermont. Details and example types of work are described below in Section B. Scope of Work.

Expected outcomes of this project include increased or enhanced organizational capacity that provides long-term support for educational events, trainings, and workshops available for the agricultural community, technical assistance to farmers and custom applicators, enhanced knowledge and implementation of agricultural Best Management Practices (BMPs), compliance with the Required Agricultural Practices (RAPs), phosphorus reductions, reduced nutrient runoff, reduced erosion, and enhanced conservation planning and practice implementation with economic and environmental benefits for farms and the state of Vermont.

The Agency is calling for proposals that address the following priority outcomes to improve water quality in Vermont:

- **Regulatory Compliance and Agricultural Non-Point Source Pollution Reduction:** Increasing education, technical assistance, and conservation practice implementation are crucial activities in helping Vermont farmers achieve compliance with the Required Agricultural Practices (RAPs) and Medium and Large Farm Operation Rules. The desired outcome of regulatory compliance is both the reduction of agricultural non-point source pollution and the improvement of soil health. In addition to providing other benefits to farmers and the general public, soil health is correlated to the improvement of water quality on farms.
- **Economic and Environmental Viability on Vermont Farms:** Farm viability and environmental stewardship are not mutually exclusive. Economically viable farms are in a better position to afford the implementation of conservation practices and make on-farm improvements, some of which can provide long-term financial benefits back to the farm. Through farm business planning, technical and financial assistance as well as research and implementation of opportunities to increase the economic viability of farms in Vermont, farmers can make investments to lessen their impact on the environment. This is increasingly important as farms adapt to the on-farm phosphorus reduction strategies needed to meet nutrient management requirements and overall water quality goals.

B. Eligibility

Applicants are encouraged to submit a single proposal per organization except in situations where discrete and separate programs exist within one organization. Eligible applicants include:

- Farmers, farmers' partners, agricultural engineering and/or consulting firms, agricultural organizations and trade associations
- Local government entities including municipal boards, commissions, or committees
- Public or private schools or other educational institutions
- Organizations with nonprofit status, or citizen groups such as watershed or lake associations working in coordination with such an organization, that apply on their behalf and will manage the grant funds
- State and Federal government agencies may collaborate with one of the above groups, but are not eligible to be the primary applicant under this grant program
- While matching funds are highly encouraged, they are not required for program eligibility

- Applicants must be in compliance with all state regulations (i.e. water quality, taxes, child support) and in good standing with the State of Vermont at the time of submitting an application and must remain so during the entire grant period

C. Scope of Work

The work to be performed with this grant opportunity is to implement organizational capacity and development activities in order to better address the state's water quality goals through water quality efforts on Vermont farms. These include the Lake Champlain Total Maximum Daily Load (TMDL), Ticklenaked Pond TMDL, Lake Memphremagog TMDL, Lake Carmi TMDL for phosphorus, and the Long Island Sound TMDL for dissolved oxygen, as well as additional TMDLs for various rivers and streams contained within these larger watersheds. Priorities toward meeting these TMDLs are identified in Tactical Basin Planning process, and in alignment with goals of Act 64, the Clean Water Act. This funding opportunity will support discrete organizational capacity development activities that will result in increased and enhanced services to the agricultural community related to improving water quality and reducing runoff from agricultural operations. The agency seeks proposals for organizational capacity development initiatives.

Providing education and outreach, technical assistance, and services to the agricultural community requires knowledge, expertise, staff, materials, and organizational structure. This grant opportunity will support the Grantee(s) to enhance organizational capacity resulting in more effective services to the agricultural community related to improving water quality. Eligible activities may include, but are not limited to:

- Operational expenses such as staffing costs or field equipment
- Purchase of software for improved database or financial management (such as GIS or bookkeeping and accounting software)
- Strategic planning
- Board development and board trainings
- Staff and volunteer trainings
- Mentorship for new employees
- Administration and management of specific programs such as the management of equipment rental programs
- Planning, development and implementation of new initiatives, programs, or services

Discrete one-time investments that will provide long-term benefit to the applicant's organization and services to Vermont farmers are encouraged.

In appropriate cases, the Agency may reserve the right to partially fund proposals by funding discrete activities, portions, or phases of a proposal. As described in Section D. Proposal Format, proposals must include a budget plan that estimates costs for each activity area and category of costs (e.g., labor, fringe benefits, travel, equipment, supplies, contractors, and other direct costs or indirect costs).

D. Performance Requirements

The performance requirements for this agreement will be the successful administration of the proposed scope of work related to organizational capacity development prescribed in Section B. Scope of Work. The Grantee(s) may be requested to meet with the Agency Grant Manager as often as a quarterly basis to discuss progress. Award recipients will be required to submit semi-annual narrative reports and associated invoices as well as a final narrative report outlining accomplishments and outcomes achieved. Progress must be measured with Results Based Accountability (RBA) measurements, and the final report shall summarize outputs and outcomes of all the grant activity. RBA measures of outputs and outcomes shall be proposed by the applicant in their proposal. Measures proposed should represent the outcomes of the proposed scope of work that demonstrate the impact of the project. Below are example outcomes and outputs associated with Organizational Capacity Development activities:

Activity Area	<u>EXAMPLE</u> Outputs & Outcomes
Organizational Capacity	<ul style="list-style-type: none">• # FTE supported by Ag-CWIP• # Of hours of trainings/workshops attended by staff (2-hour training attended by 3 staff = 2 hours of training)• # Strategic Plans, % strategies implemented• # Equipment/Software Purchased• # Board Meetings/Stakeholder Meetings• #/% Reduced time spent on [specified] administrative task• % Of clients satisfied with service• # New services provided• % Of staff felt equipped to do their job• % Of staff with skills/knowledge improved• #/% Of farmers that would recommend this service

In addition to meetings with the Agency throughout the duration of the project, invoices, and RBA measurements, applicants are also responsible for describing the methodology for collecting and analyzing data and feedback from program participants to understand if desired outcomes are being achieved as part of their semiannual and final reports.

E. Selection Criteria and Schedule

Selection Criteria

Proposals will be reviewed and evaluated by three or more Agency staff members and/or technical advisors. Selection will be based on the following criteria:

1. **Completeness** – All proposals shall be evaluated for completeness. Incomplete proposals will not be evaluated.
2. **Applicant Status**
Proposals submitted by non-profit organizations will be prioritized for funding.
3. **Geographic Area**
Project geographic area will be considered based on geographic priorities as described and justified in the Grantee's project proposal, and how the proposed work will be available to that geographic area.
4. **Cost – 40%**
Cost evaluation will consider the average annual cost of each activity area in your proposal relative to other proposals, as well as the clarity of your budget and budget justification, and relation to anticipated outcomes.
5. **Impact – 40%**
The impact of the proposed program will be evaluated based on the proposed activities alignment with the Agency priorities described above. Also evaluated will be the relative temporal scale of impact in relation to the proposed activities, the ability of the proposal to build off existing work, catalyze new partnerships and

networks, as well as provide specific, realistic, measurable, and achievable goals. Priority will be given to discrete projects that can demonstrate sustainable long-term impact.

6. Past Performance and Capacity – 20%

Past performance and capacity will be based on both the capacity and qualifications of the organization to engage in the proposed activity areas, as well as the past performance of the organization in receiving grants or contracts from the Agency of Agriculture within the past five years. For instance, were previous grant reports received from the applicant organization complete, timely, and satisfactory, or are there previous instances of agreement performance issues.

Schedule of Funding Opportunity

- Notification of grant award will be on or before March 15, 2023.
- The Grant period may be up to 2 years, we anticipate establishing grant awards based on the grant proposal shortly after award notice on March 15, 2023.
- Project work cannot begin until a grant agreement period has officially started. The Agency will not pay for expenses incurred prior to the grant start date.
- All materials and information, regardless of physical form, produced as a result of this project, shall be made available to the Agency in a suitable file format. The Agency shall have unrestricted use of any materials, software, maps, studies, reports and other products or data generated using grant funds or specified as deliverables in the grant application.

F. Grant Agreement, Payment, and Reporting

Grant Agreement and Payment

Funding for the Ag-CWIP grants is contingent upon available funding. Prior to receiving funding, successful applicant must sign a grant agreement with the State indicating their intent to complete the proposed project and authorizing the Agency to monitor the project's progress. The grant agreement will include provisions (terms and conditions) set by the State as well as any program-specific requirements. Please review Attachment C: Standard State Provisions for Contracts and Grants for details about state provisions that all awardees will be required to adhere to.

The State intends to execute deliverable-based grant agreements. The maximum dollar amount payable under this grant is not intended as any form of a guaranteed amount. Invoices submitted before the completion of an interim or final report will not be paid until the report has been received, reviewed, and accepted by the grant manager. The Agency cannot reimburse Grantee(s) for work performed before the start date or after the expiration date of the grant.

Reporting Requirements

Grantee(s) may be required to meet with an Agency Grant Manager quarterly to review accomplishments and progress towards meeting outcomes and outputs.
