

## On-Farm Compost Siting Requirements

<b>Setback</b>	<b>Distance</b>
Nearest public or private water supply not owned by the farm	300 ft.
Seasonal highwater table and bedrock	3 ft.
Surface water	300 ft.
Ditch or conveyance to surface water	100 ft.
All property lines and edge of public road	200 ft.
Neighboring residences and public buildings	300 ft.
Subsurface tile drainage	100 ft.
Flood plains	Prohibited within floodways, areas subject to annual flooding or concentrated runoff
Airports	10,000 feet of a runway used by turbojet aircraft, or 5,000 feet of a runway used only by piston-type aircraft.
Municipal Zones	Prohibited within a downtown, village center, new town center, neighborhood development area, or growth center designated under 24 V.S.A. chapter 76a, unless the municipality has expressly allowed composting in the designated area under the municipal zoning or subdivision bylaws or in an approved municipal plan.
