DEFINITION Prescreened Pesticide List: a list of pesticide active ingredients which due to their relative immobility and limited persistence (as measured by parameters such as, but not restricted to, solubility, Koc and half-life) are unlikely, under normal conditions and acceptable uses, to leave established turf grass and enter surface and/or ground water.

CRITERIA: Koc > 300; Sol in H2O < 20ppm; GUS ≤ 1.8 or if Solubility < 1ppm and half-life < 1
